XIII. Read the passage given below and answer the questions that follow

You may have heard of 3-D movies. You may have even seen one. The D in 3-D stands for dimensional. A dimension is a direction that something can be measured. Flat things can be measured in two ways. They can be measured by length and width. That's why flat things are sometimes called 2-D or two dimensional. Three dimensional things can be measured in three ways. They can be measured by length and width like flat things. They can also be measured by their height. Height is what lets them come up of the paper or the screen. Three dimensional shapes in maths are called solids.

26. What is a dimension? (1)
27. How can three dimensional things be measured? (2)

SECTION B

(25 marks)
