XIV. Read the following passage and answer the questions given below.

In every country people imagine that they are the best and cleverest and the others are bad and foolish. The Englishman thinks that his country is the best; the French are very proud of France and every thing that is French. The Germans and Italians think no less of their countries. This is wrong. Everybody wants to think well of himself and his country. But really there is no person who has not got some good and some bad qualities. In the same way, there is no country which is not partly good and partly bad. We must take the good wherever we find it and try to remove the bad wherever it may be. We are ofcourse, most concerned with our own country, India. Unfortunately, it is in a bad way today. Most of our people are poor and unhappy. They have no joy in their lives. We have to see what is good in our ways and customs and try to keep it, and whatever is bad we have to remove that. If we find anything good in other countries we should certainly take it.

25. Form abstract nouns.
